

LINCS Standardized Unique Small Molecule IDs (LSM)

Release Notes

BD2K-LINCS Data Coordination and Integration Center

Release Date: June 1, 2015

Description

The LINCS standardized small molecule ID is the unification at the compound level provided information from diverse LINCS Screening Centers.

LINCS Small Molecule Release Summary

Total number of LINCS unique compounds (SM_LINCS_ID) = 41744

File names:

CompoundTable_LINCS_StandardizedCmpds_LSMIDs_28May2015.txt

(Compound table with LINCS Small Molecule IDs)

SampleTable_LincsID2FacilityID2CenterBatchID_LINCS_StandardizedCmpds_LSMIDs_28May2015.txt

(Sample table with LINCS Screening Center identifiers for the standardized LINCS Small Molecule IDs)

LincsID2FacilityID_LINCS_StandardizedCmpds_LSMIDs_28May2015.txt

(Mapping table between the LINCS Small Molecules and LINCS Screening Centers)
